

Digital Accounting information systems in resilient and sustainable organizations and society

The objective of the track is to bring together researchers from all disciplines related to Accounting and Management Information Systems in order to debate on the relationship between accounting and information technology.

The track particularly aims to stimulate the debate and the research concerning the interaction between digital and smart technologies and accounting information systems, in order to investigate their support to resilience and sustainability of organizations.

The objective is to bring together researchers from all scientific fields related to Digital Accounting Information Systems for a high-level interaction, discussion, and exchange of fruitful ideas in the setting of the Italian AIS (ItAIS).

The following Journal support AIS track with special issues and fast track for publication:

- The International Journal of Digital Accounting Research,
- Management Control.
- International Journal of Digital Culture and Electronic Tourism.

This track is supported by the Interest Study Group entitles “Smart technologies, Digitization and Intellectual Capital” of Italian Academy of Accounting and Business Administration (SIDREA).

Track main topics

Themes of interest are:

- 1) Measure, report, and audit sustainability in digitalized organizations
- 2) Accountants’ role and skills for resilience and sustainability in digitalized organizations

In each of these themes, the track will cover a wide range of topics as follows:

- Artificial intelligence
- Social media
- XBRL and sustainability reporting
- Big Data
- Internet of Things
- Collaborative platform
- Blockchain
- Analytics
- Diversity, equality, and inclusion
- Risk
- Ethic

Perspectives from diverse fields such as computer science, accounting, psychology, sociology, cognitive science, political science, behavioral science, and economics as well as high-quality and theoretically sound studies of any type (quantitative/qualitative studies, action research, surveys, behavioral/experimental studies, design science, case studies, theory development, etc.) are equally encouraged. Papers concerning

XVIII Conference of the Italian Chapter of AIS

Digital resilience and sustainability: people, organizations, and society

different contexts and industry, such as private and public companies, inter-organizational networks, Universities, cities, SMEs, and multinational enterprises and organizations will be considered.

Papers are also welcome, bringing together researchers and practitioners to improve different research perspectives. Theoretical or empirical studies are equally encouraged as well as different kind of research methodology. Completed research and research-in-progress papers will be accepted.
