Contents:

ENROAC, the European Network for Research on Organizational and Accounting Change, is pleased to announce its Tenth DOCTORAL and EARLY CAREER RESEARCHERS SUMMER SCHOOL IN MANAGEMENT ACCOUNTING to be held in Siena, Italy. The first doctoral summer school was held in Siena, in 2002, and since then the ENROAC Summer Schools have provided an opportunity for scholars in management accounting to discuss their research plans, work in progress or full papers with a distinguished international faculty. Overviews of the current state of management accounting research have also been included in the programme, as have social events to provide an opportunity for participants to interact informally both with each other and with the faculty.

The Tenth Doctoral and Early Career Researchers Summer School will focus on how changes in and around organizations influence management accounting practices. Furthermore, the way in which management accounting and control systems enable and constrain processes of organisational and cultural change will also be discussed.

PhD students and Early Career Researchers with an interest in the following themes are encouraged to apply (these themes are indicative, but not exhaustive):

- Expected and unexpected managerial and accounting consequences of introducing new business models, modes of collaboration, coordination and information exchange
- Privatization, deregulation and other changes in the institutional business environment, and their effect on management accounting and control systems
- Broadening perspectives on management accounting: including links with ‘business economics’
- Implementation of digital accounting and big data
- Management accounting effects of the introduction of European mandatory external disclosures
- Changes in criteria for professional certification as a result of changes in the broader accounting institutional environment
- Institutional conceptualizations of stability/change in accounting routines
- Developments in wider, institutional theory, and its consequences for studying management accounting change
- Implementation of new costing systems and new performance measurement systems
- Management accounting for innovation, major programmes and project management
- Integrated Thinking and Reporting: the role of Management Accountants
- Management Control, Sustainability Accounting and Accounting for Sustainable Development
- Design and practice of management accounting and data visualizations, visual analysis of management accounting technologies, the role of the visual in processes of institutionalization
- Critical and historical perspectives into management accounting
- New research methods into management accounting change
- Management accounting in dynamic environments

Practicalities: Prospective participants should submit an extended abstract of their research proposal (**maximum 3 pages with research motivations, aims, methodology, preliminary results and/or expected contribution, and key references**). Notification of acceptance will be given as abstracts are received, and within 10 days from submission of the application. Registrations will open following acceptance. To boost interaction, the maximum number of participants will be 25. Therefore, an early application is advisable. **Additional information will be available at <http://www.enroac.net>**

The accommodation and the Summer School sessions are both at the same location, the *Certosa di Pontignano*, a magnificent, old monastery in the outskirts of Siena (the history and pictures of the Certosa are available at <https://www.lacertosadipontignano.com/en/index.php>). Registration fee: € 490 full board accommodation (day in 23 June, day out 26 June 2024).

Enquiries and Submission of extended abstract should be emailed to: gianluca.vitale@unisi.it
